Increase Animal Visibility

▪ Aggressively market your animals. Automatically update Petfinder, PetArk, Pets911. Your own customizable adoption and stray web site is included. Utilize lobby and off-site kiosks. Customize your own adoption posters, kennel cards and bulk emails. Effectively utilize rescue and foster partners.

Streamline Operations

▪ *End-user* configurable to meet your needs. Includes the most advanced animal control service request processing, licensing and animal routing system in the industry.

▪ Monitor and control your operations. Create an environment where policies can be audited and enforced. AnimalShelterNet enables you to identify and implement measurable quality objectives.

▪ AnimalShelterNet's built-in reports keep you on top of grant programs as well as state and locally mandated reporting requirements.

Utilize New Resources

▪ Send bulk e-mails. Computer dispatch service requests. RF/microchip and bar-coding of collars, cage cards, and documents. Reduce impounds with Early Return wireless in-field animal identification. Support off-site initiatives with remote access.

The Possibilities are Endless

Run AnimalShelterNet stand-alone on your laptop or PC. Host it on your own server or ours and access it securely via Internet Explorer from anywhere. Utilize all existing and emerging wireless network technologies.

Nothing to install, update or maintain on client PC's. Download and install server updates automatically.
